What are Recipe Settings and Why Do We Use Them?

recipe

/ˈresɪpi/

noun

1. a set of instructions for preparing a particular dish, including a list of the ingredients required.

A recipe in this instance would be for a drink, i.e. a cocktail

We use recipe settings alongside EPOS codes for auto till imports to deplete the necessary stock for all drinks that are sold through the till.

How to Update Recipe Settings

When you click on the Recipe Settings tab on the left hand side, it will come up with a list off all Recipe settings that are currently being used by the site.

Save Epos Codes

From here, you can add the EPOS codes and their relevant titles, in the above case there are two codes for the same recipe, due to an offer being in place. This is because the tills are set up to have a different button depending on when the offer is live.

To add a new EPOS Code to an existing Recipe, click 'Add New Code' button and this will create a new line to enter details in.

New Recipe

This will bring up a new screen requiring you to name the new recipe that you are setting up.

A screenshot of a mobile application interface showing a 'Create New Recipe' dialog box. The dialog has a title bar with the text 'Create New Recipe' and a close button (an 'x' icon) on the right. Below the title bar, there is a label 'Recipe Title' followed by a text input field containing the text 'Test Recipe'. At the bottom right of the dialog, there is a blue button with the text 'Create'. A hand cursor icon is pointing at the 'Create' button. The dialog is overlaid on a background that is partially visible, showing the 'Recipe Settings' header and the 'New Recipe' button from the previous screen.

Once you have named the recipe, click 'Create'

From the next screen, you are able to search for the products to add to the recipe and click the plus button
